High cathedral ceilings, tall windows, and open design fill the Cypress with light and space. A large family room centers the home and opens into the adjacent kitchen, featuring a large eating bar, walk-in pantry, and attached dining room. Two bedrooms, a utility closet, and a full bath branch off from the kitchen to create a private living environment. The master suite dominates the opposite side of the home, complete with an oversize shower and soaking tub in the bathroom, a dressing area, and a large walk-in closet. Use the extra room next to the foyer as a study or play room, or convert it into a fourth bedroom for your guests or growing family.
